

You Can Be More Productive In and Out Of The Office With FlashPoint ShareDrives

FlashPoint ShareDrives Is a Mobility Solution Which Increases Productivity Like No Device

New technologies and tools are changing the way business is performed which if it can be improved will give companies a competitive edge. FlashPoint ShareDrives give your employees a competitive edge. They permit greater flexibility and increased responsiveness to your customers. They increase the ease of exchanging documents with other workers. They solve an important problem of not being able to copy away from a computer. Now, with FlashPoint ShareDrives they have this mobile capability to copy files and folders or an electronic information. FlashPoint ShareDrives give your employees the ability to capitalize on opportunities in real time instead of the next hour or the next business day. Waiting can sometimes mean you are too late. They may be too late to win a business opportunity or too late to meet a deadline date. FlashPoint ShareDrives are a high-performance electronic tool which provides the mobile tool for even greater worker productivity.

On the average people use FlashPoint ShareDrives later in the day when productivity is lower.

Thumbdrive to Thumbdrive copying when workers are mobile is just one advantage of FlashPoint ShareDrives. Copying from Digital Camera's, cellphone's and other USB devices is also major benefits of using FlashPoint ShareDrives. Studies show productivity lowers as the workday progresses. The bottom line is worker's productivity is best in the early morning. Whatever the worker's measured output is, it is at its peak at the beginning of the day (allowing for a certain amount of "getting started" momentum), when the employee has the most energy. As the day wears on, his or her productivity declines, until they leave, tired and worn out, at the end of the day. Our studies show that FlashPoint ShareDrives are used more after the early morning hours, as the day processes. The highest FlashPoint ShareDrive use is from 12:00 pm (Lunch time) until 7:00 pm. This FlashPoint ShareDrive time of use is an advantage to companies who want to make their workers more productive during these hours later in a day. FlashPoint ShareDrives are an easy to use electronic device which enhances productivity by keeping the workers productive during the declining part of the day and as the day progresses. Therefore, FlashPoint ShareDrives increase the workers average output throughout the day. Increased

output usually translates to increased dollars, and the payback on the profits of a company.

Exchanging Document, Messages and Business Information Increases Productivity

The fact that productivity can be increase by exchanging information is proven by looking at the effects of Email. Email increases productivity when it is used to send documents to coworkers, customers or partners. Email, in most cases, reaches people instantly. It reduces delay in communication when a document is provided in this fashion. The low cost of sending email, versus high cost of sending postage mail, helps businesses reach their profit goals. FlashPoint ShareDrives has some of the same positive effects on productivity which email has regarding exchanging information when you are face to face with coworkers, customers and partners. With FlashPoint a document can be given on the spot without a delay or the need to find a computer to perform this task. FlashPoint reduces the delay in communication in transfer a file or folder of electronic information. Two people at lunch can instantly exchange document, and other information from an electronic business card to a brochure.

Email enables workers to increase productivity when they collaborate on projects by exchanging documents through attachments. Flashpoint ShareDrives increase productivity when they collaborate on projects by exchanging document from thumbdrive to thumbdrive. Email eliminates phone tag. FlashPoint ShareDrives eliminate being told I will send you a file when I get back to my computer. Files and Folders on your FlashPoint ShareDrive can now be copied to other thumbdrives when you are mobile. Therefore it reduces the likeliness of wasted time before a decision is made.

Summary
