- It is a FM Radio**
- It is a Recording Device**
- It is a Ultra-Sensitive Microphone**
- It is a Sharing-On-The-Go Device**

If you're the type of person who's on the go all the time and wants to jam to your favorite tunes while commuting to work, trekking across campus, or working out, then having the "right" MP3 player is essential. The FlashPoint SharePlayer takes the MP3 experience one step further – Now you can copy MP3 files and any other files or folders while on the go. Xmultiple Technologies patent pending FlashPoint MP3 SharePlayer revolutionizes the current MP3 Players on the market. With SharePlayer users are now given the ability to operate dual directional copy technology. Our SharePlayer is a chip-based firmware and hardware technology, which can be incorporated into any USB type of MP3 Player/ flash memory device. SharePlayer is capable with transferring of music files, MP3 files, data files, video files and folders within to any other MP3 Player with a standard USB male connector. LCD permits you to select the exact files or folders you want to transfer.

When mobile, SharePlayer gives you the option to work without the use of a computer or connection device. The FlashPoint MP3 SharePlayer contains both a male and a female USB connector that enable the uploading and downloading capability.

### Features and Benefits

**SharePlayer Technology Copies when mobile – Simply plug a MP3 Player male USB into the FlashPoint MP3 SharePlayer female USB connector – And click the “Confirm” button. Compatible with thumbdrives and MP3 Players with an integrated male USB connector.**

## About FlashPoint SharePlayer

FlashPoint SharePlayer technology is a new supplement to the USB 2.0 specification. It challenges the capability of existing mobile devices and USB peripherals by giving them an added host competency for connection to other USB devices. FlashPoint MP3 SharePlayer (one and only) features are listed below.

•**Xmultiple's Proprietary USB FlashPoint with SharePlayer Technology:** The FlashPoint SharePlayer firmware and hardware provides the capability to copy from one MP3 Player to another just by plugging them together and click the "Confirm" button.

•**Female USB 2.0 Connector:** Unlike all other MP3 Player/ flash memory devices, the FlashPoint MP3 SharePlayer enables data transfer to other devices, not just copy from other devices. As the result FlashPoint MP3 SharePlayer devices can act as a "host" and can accommodate other devices to connected to it.

•**Function Switches:** User controllable bi-directional switch is incorporated to operate Share (upload), Load (download), and Delete functions.

## Sharing-On-The-Go (SOTG) Data Transfer – Upload and Download From and To FlashPoint MP3 SharePlayers

For active people, a MP3 Player that will copy music while mobile is a distinct advantage over a player without this capability. Other than the standard features of the ordinary MP3 Player, with the SharePlayer you do not have to wait until you get to a computer to transfer music, files and folders.

FlashPoint MP3 SharePlayer is designed with connectors to connect to a PC, notebook or other similar devices just like conventional MP3 Players. Feature-wise, SharePlayer can also be used as a flash memory drive for storage purpose and a step further to "Share" music, files and folders with other users by one click to perform transferring anywhere at anytime. We also make it easy with the LCD display to select the music, files or folders to share or have the preference files saved in the Directory named SHARE, then you can easily transfer the selected files all at once.
